"We believe that our strategic actions in the third quarter are aligned with these goals including opportunistically enhancing our capital structure through the issuance of notes at historically low levels, acquiring the remaining interest in Borgata, and increasing our exposure in the largest gaming market in the world through the purchase of an additional stake in MGM China."

In addition, MGM Resorts will post supplemental slides today on its website at [www.mgmresorts.investorroom.com](http://www.mgmresorts.investorroom.com) for reference during its November 7, 2016 earnings call.

- 1 REVPAR is hotel revenue per available room.
- 2 "Adjusted EBITDA" is earnings before interest and other non-operating income (expense), taxes, depreciation and amortization, preopening and start-up expenses, NV Energy exit expense, goodwill impairment charges and property transactions, net. "Adjusted Property EBITDA" is Adjusted EBITDA before corporate expense and stock compensation expense related to the MGM Resorts stock option plan, which is not allocated to each property. MGM China recognizes stock compensation expense related to its stock compensation plan which is included in the calculation of Adjusted EBITDA for MGM China. "Same-store Adjusted Property EBITDA" is Adjusted Property EBITDA related to operating resorts which were consolidated by the Company for both the entire current and prior year periods presented. Adjusted EBITDA information is presented solely as a supplemental disclosure to reported GAAP measures because management believes these measures are 1) widely used measures of operating performance in the gaming industry, and 2) a principal basis for valuation of gaming companies.

Management believes that while items excluded from Adjusted EBITDA, Adjusted Property EBITDA, and Same-store Adjusted Property EBITDA may be recurring in nature and should not be disregarded in evaluation of the Company's earnings performance, it is useful to exclude such items when analyzing current results and trends compared to other periods because these items can vary significantly depending on specific underlying transactions or events that may not be comparable between the periods being presented. Also, management believes excluded items may not relate specifically to current operating trends or be indicative of future results. For example, preopening and start-up expenses will be significantly different in periods when the Company is developing and constructing a major expansion project and will depend on where the current period lies within the development cycle, as well as the size and scope of the project(s). Property transactions, net includes normal recurring disposals, gains and losses on sales of assets related to specific assets within the Company's resorts, but also includes gains or losses on sales of an entire operating resort or a group of resorts and impairment charges on entire asset groups or investments in unconsolidated affiliates, which may not be comparable period over period.

In addition, capital allocation, tax planning, financing and stock compensation awards are all managed at the corporate level. Therefore, management uses Adjusted Property EBITDA and Same-store Adjusted Property EBITDA as the primary measure of the Company's operating resorts' performance.

Adjusted EBITDA, Adjusted Property EBITDA and Same-store Adjusted Property EBITDA should not be construed as alternatives to operating income or net income, as indicators of our performance; or as alternatives to cash flows from operating activities, as measures of liquidity; or as any other measure determined in accordance with generally accepted accounting principles. We have significant uses of cash flows, including capital expenditures, interest payments, taxes and debt principal repayments, which are not reflected in Adjusted EBITDA, Adjusted Property EBITDA or Same-store Adjusted Property EBITDA. Also, other companies in the gaming and hospitality industries that report Adjusted EBITDA, Adjusted Property EBITDA or Same-store Adjusted Property EBITDA information may calculate Adjusted EBITDA, Adjusted Property EBITDA or Same-store Adjusted Property EBITDA in a different manner.

Reconciliations of GAAP net income (loss) to Adjusted EBITDA and GAAP operating income (loss) to Adjusted Property EBITDA and Same-store Adjusted Property EBITDA are included in the financial schedules in this release.
