#### Domestic Resorts

Casino revenue for the fourth quarter of 2016 increased 33% compared to the prior year quarter, due primarily to the acquisition of Borgata Hotel Casino and Spa ("Borgata"), the MGM National Harbor opening on December 8, 2016, and an increase in both table games and slots revenue. Casino revenue increased 3% on a same-store basis compared to the prior year quarter. Same-store table games hold percentage in the fourth quarter of 2016 was 22.5% compared to 20.0% in the prior year quarter. Slots revenue increased 3% on a same-store basis compared to the prior year quarter.

Rooms revenue increased 10% compared to the prior year quarter. On a same-store basis, rooms revenue increased 4% compared to the prior year quarter. Las Vegas Strip REVPAR increased 3%. The following table shows key hotel statistics for the Company's Las Vegas Strip resorts:

<u>Three months ended December 31,</u>	<u>2016</u>	<u>2015</u>
Occupancy %	89%	89%
Average Daily Rate (ADR)	\$ 157	\$ 152
Revenue per Available Room (REVPAR)	\$ 140	\$ 136

Operating income at the Company's domestic resorts was \$312 million for the fourth quarter of 2016 compared to \$308 million in the prior year quarter. Domestic resorts Adjusted Property EBITDA increased 14% to \$493 million in the fourth quarter of 2016 and was positively impacted by approximately \$30 million of Adjusted Property EBITDA growth generated from the Company's Profit Growth Plan initiatives as well as \$45 million of Adjusted Property EBITDA resulting from the Borgata transaction and \$10 million of Adjusted Property EBITDA resulting from the December 2016 opening of MGM National Harbor. Same-store Adjusted Property EBITDA increased 1% compared to the prior year quarter.

The Company's domestic resorts were impacted by a lower number of convention room nights compared to the prior year quarter, primarily driven by the October holiday calendar shift as well as the rotation and timing of certain conventions. The reduced convention room nights were replaced primarily with casino room nights, which benefitted our table games and slots business and was offset by lower catering and banquets and production services.

Mr. Murren added, "In the fourth quarter of 2016, we drove growth in REVPAR and EBITDA despite a record convention business fourth quarter in the prior year. Our convention business this year resulted in the second highest fourth quarter in the Company's history, and we also successfully leveraged our database and delivered new entertainment offerings to drive customers to our resorts. We continue to invest in our business and remain encouraged by the opportunities we see in 2017. We expect to achieve Las Vegas Strip REVPAR growth of 7% in the first quarter of 2017."

1 REVPAR is hotel revenue per available room.

2 "Adjusted EBITDA" is earnings before interest and other non-operating income (expense), taxes, depreciation and amortization, preopening and start-up expenses, NV Energy exit expense, goodwill impairment charges, gain on Borgata transaction, and property transactions, net. "Adjusted Property EBITDA" is Adjusted EBITDA before corporate expense and stock compensation expense related to the MGM Resorts and MGP stock option plans, which are not allocated to each property. MGM China recognizes stock compensation expense related to its stock compensation plan which is included in the calculation of Adjusted EBITDA for MGM China. "Same-store Adjusted Property EBITDA" is Adjusted Property EBITDA related to operating resorts which were consolidated by the Company for both the entire current and prior year periods presented. Adjusted EBITDA information is presented solely as a supplemental disclosure to reported GAAP measures because management believes these measures are 1) widely used measures of operating performance in the gaming industry, and 2) a principal basis for valuation of gaming companies.

Management believes that while items excluded from Adjusted EBITDA, Adjusted Property EBITDA, and Same-store Adjusted Property EBITDA may be recurring in nature and should not be disregarded in evaluation of the Company's earnings performance, it is useful to exclude such items when analyzing current results and trends compared to other periods because these items can vary significantly depending on specific underlying transactions or events that may not be comparable between the periods being presented. Also, management believes excluded items may not relate specifically to current operating trends or be indicative of future results. For example, preopening and start-up expenses will be significantly different in periods when the Company is developing and constructing a major expansion project and will depend on where the current period lies within the development cycle, as well as the size and scope of the project(s). Property transactions, net includes normal recurring disposals, gains and losses on sales of assets related to specific assets within the Company's resorts, but also includes gains or losses on sales of an entire operating resort or a group of resorts and impairment charges on entire asset groups or investments in unconsolidated affiliates, which may not be comparable period over period.

In addition, capital allocation, tax planning, financing and stock compensation awards are all managed at the corporate level. Therefore, management uses Adjusted Property EBITDA and Same-store Adjusted Property EBITDA as the primary measure of the Company's operating resorts' performance.

Adjusted EBITDA, Adjusted Property EBITDA and Same-store Adjusted Property EBITDA should not be construed as alternatives to operating income or net income, as indicators of our performance; or as alternatives to cash flows from operating activities, as measures of liquidity; or as any other measure determined in accordance with generally accepted accounting principles. We have significant uses of cash flows, including capital expenditures, interest payments, taxes and debt principal repayments, which are not reflected in Adjusted EBITDA, Adjusted Property EBITDA or Same-store Adjusted Property EBITDA. Also, other companies in the gaming and hospitality industries that report Adjusted EBITDA, Adjusted Property EBITDA or Same-store Adjusted Property EBITDA information may calculate Adjusted EBITDA, Adjusted Property EBITDA or Same-store Adjusted Property EBITDA in a different manner.

Reconciliations of GAAP net income (loss) to Adjusted EBITDA and GAAP operating income (loss) to Adjusted Property EBITDA and Same-store Adjusted Property EBITDA are included in the financial schedules in this release.
